COPYING

The *Journal* is registered with the Copyright Clearance Center, 27 Congress St., Salem, Mass. 01970. Organizations in the USA which are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per-copy fee of $5.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022-1120/89/$5.00 + .00

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA is authorized to supply single copies of separate articles for private use only.

For all other use of material from the *Journal* permission should be sought from Cambridge or the American Branch of Cambridge University Press.

SUBSCRIPTIONS

The JOURNAL OF FLUID MECHANICS (ISSN 0022-1120) is published by the Cambridge University Press in 12 volumes each year. All orders must be accompanied by payment. Single volumes cost £38 net (US $75 in the USA and Canada) plus postage. The subscription price in the UK (which includes postage) to volumes 198–209, 1989, is £410, £450 elsewhere (US $880 in the USA and Canada) for institutions: £225 (US $450) for individuals. Copies of the journal for subscribers in the USA and Canada are sent by air to New York. Second class postage is paid at New York, NY, and at additional mailing offices. Claims for missing issues will be considered only if made immediately upon receipt of the subsequent issue. Copies of back numbers are available from Cambridge University Press. POSTMASTER: send address changes in USA and Canada to *Journal of Fluid Mechanics*, Cambridge University Press, 110 Midland Avenue, Port Chester, New York, NY 10573.

Volume 207 October 1989

CONTENTS

	page
On the flow between a porous rotating disk and a plane. M. A. Goldshtik and N. I. Javorsky	1
The motion of a rigid body in a viscous fluid bounded by a plane wall. Richard Hsu and Peter Ganatos	29
Nonlinear evolution of oblique waves on compressible shear layers. M. E. Goldstein and S. J. Leib	73
Nonlinear evolution of interacting oblique waves on two-dimensional shear layers. M. E. Goldstein and S.-W. Choi	97
Combined buoyant–thermocapillary flow in a cavity. Bradley M. Carpenter and G. M. Homsy	121
Extremal energy properties and construction of stable solutions of the Euler equations. G. K. Vallis, G. F. Carnevale and W. R. Young	133
Time-dependent convection in a fluid-saturated porous cube heated from below. S. Kimura, G. Shubert and J. M. Straus	153
The shearless turbulent mixing layer. S. Veeravalli and Z. Warhaft	191
The effect of barotropic instability on the nonlinear evolution of a Rossby-wave critical layer. Peter H. Haynes	231
Selection of convective planform orientation by boundary anistropy. Arne J. Pearlstein and Alparslan Oztekin	267
Momentum disturbances and wave trains. A. Dixon	295
Experimental investigation of convective stability in a superposed fluid and porous layer when heated from below. Falin Chen and C. F. Chen	311
Heating a salinity gradient from a vertical sidewall: linear theory. Oliver S. Kerr	323
Hydrodynamic interaction of two unequal-sized spheres in a slightly rarefied gas: resistance and mobility functions. Ruoxian Ying and Michael H. Peters	353
Flow development in a model airway bronchus. B. Snyder and D. E. Olson	379
Removing the irregular frequencies from integral equations in wave–body interactions. C.-H. Lee and P. D. Scalvounos	393
Spectra and energy transfer in stably stratified turbulence. E. C. Itsweire and K. N. Helland	419
Convection in a rotating cavity: modelling ocean circulation. Scott A. Condie and Ross W. Griffiths	453

A numerical and experimental investigation of a new solution in the Taylor vortex problem. D. K. Anson, T. Mullin and K. A. Cliffe 475

Buoyant laminar flow of air in a long, square-section cavity aligned with the ambient temperature gradient. G. S. H. Lock and J.-C. Han 489

Slow spreading of a sheet of Bingham fluid on an inclined plane. Ko Fei Liu and Chiang C. Mei 505

Lagrangian statistics from direct numerical simulations of isotropic turbulence. P. K. Yeung and S. B. Pope 531

Nonlinear compressible magnetoconvection. Part 1. Travelling waves and oscillations. N. E. Hurlburt, M. R. E. Proctor, N. O. Weiss and D. P. Brownjohn 587
